RECTOR'S SALUTATION ABOUT UNIVERSITY

ABOUT UNIVERSITY

Dear friends!

(Kudaibergen Zhubanov Aktobe Regional University) is the one of leaders of Kazakhstan's higher education with its 85-year history.

In 2018 the university took the 4th place and entered the 100 -TOP of the best universities of Kazakhstan.

The history of our university has absorbed not only the achievements of great ancestors, but also a rich almost centuries of its own experience in education and science. ARSU is being developed as the classical higher educational institution combining humanitarian and technical sciences, respect to national traditions, (devotion from service to society) and aspiration to personal self-improvement.

The main goal of the university is to form human capital for innovative transformation of the region and the country.

Long-term and fruitful relations connect the university with leading Kazakh enterprises and corporations, there is an academic mobility program and a system of joint grants, a scholarship program for students.

We have managed to establish ourselves on the international arena as a strong and reliable partner. Today our university faces the task of becoming an organic and active part of the international educational, scientific and information environment.

Being the intellectual core of a large industrial center, Aktobe Regional University has a unique opportunity to integrate educational, scientific and innovation activities with the needs of the real economy and social sphere. There are close ties between education, science and practice and the strength and advantage are the main for the University and its graduates.

MISSION AND VISION OF UNIVERSITY

Formation of human capital for innovative transformations of region and country.

Development of a competitive University within the country, focused on the status of the spiritual center of Western region and national University.

DIGITAL UNIVERSITY

PARK OF INNOVATIVE TECHNOLOGIES

Time of creation-October 2018

It has always been interesting to know whether a person will become a Nobel laureate: on the genes or on his work? It turned out that only 1% of the Nobel Laureate's success depends on his genetic data, yet the rest is the result of his work.

On the basis of our university with the purpose of search of new technologies for a society in November, 2017 Park of innovative Technologies or simply a Technopark was created.

It is in the Technopark that students, masters and doctoral candidates realize their most ambitious ideas! The implementation of their ideas motivates the students for further research. The Technopark is an opportunity to realize themselves in laboratories dealing with industrial waste disposal, testing of construction materials and asphalt concrete, polymer composite materials and nanotechnologies, as well as robotics and 3D prototyping.

THE CENTRE PROVIDES THE FOLLOWING SERVICES TO STUDENTS AND STAFF:

- transcript;
- * certificate of study at the University;
- * help for the payment center;
- call for students of the correspondence Department;
- academic transcript;
- * receiving applications and preparing duplicate documents;
- * issuance and registration of job applications for graduates;
- receipt of applications for modification of data of students;
- * issuing and preparing identification cards for students and employees;
- * accepting applications and issuing duplicate identification cards;
- * accepting applications and documents for reinstatement to study;
- * accepting applications for transfer to / from another University, within the University;
- * accepting applications for / from academic leave;
- * accepting applications for deduction at your own request;
- the results of the bypass sheet;
- services on the military account;
- * residence in a hostel;
- * issuing a certificate of scholarship;
- information about the cost of educational services;
- agreement conclusion.

STUDENT SCIENTIFIC SOCIETY (SSS)

Time of creation-September 2015

Student Scientists ' Society is a non-profit, non-governmental organization aimed at helping students to write, prepare and defend student papers in the field of technical and social Sciences at conferences and forums in Kazakhstan and abroad. SSS organizes and conducts seminars, round tables and debates, implements various projects for the development of scientific and research potential among students. The emphasis is not only on their professional skills, but also on their general erudition.

Projects:

1. "Without borders" - meetings between students and people who have become professionals and achieved their goals, who can share their career and life experience.
2. "Zhubanov readings" is a series of guest lectures that are held in the best universities of Kazakhstan for the purpose of professional and personal development of students.
3. Start-up academy
4. Guest lecture
5. Development of the debate movement

34 scientific club

START-UPS

BRAND STORE «ARSU STORE»

Time of creation-October 2018

"ARSU store" offers branded goods, where anyone can buy clothes with the university logo and stationery. The shop also offers books by the university professors, handmade products by students.

START-UPS

CINEMA CLUB«ZHUBANOV CINEMA»

Time of creation-March 2019

The club combines elements of entertainment and education, encouraging young viewers to be selective and demanding of themselves and the arts. The uniqueness of the cinema is that the students themselves choose which film to watch. They can vote for a film on the university's Instagram or Facebook page. Special attention is paid to national produced films.

START-UPS

«ZEREK»CHILDREN'S DEVELOPMENT CENTER

Time of creation-December 2018

The center is designed to develop the intellectual abilities of children aged 5 to 10 years. The complex offers courses on physical development, correction of disorders of the musculoskeletal system and speech, psychological support, orientation training in space, preparation for school, intellectual development, computer literacy, development of skills in the visual arts, English language training for children.

A special feature of the center is the creation of a practical zone for university students who, under the supervision of their teachers, work with children, working out pedagogical skills in the framework of dual education.

Today the center has 17 specialized classrooms, where more than 100 students are practicing in various fields. Classes are held in two shifts, both in groups and individually.

START-UPS

FASHION SALON «ZHIBEK»

The League was created on the platform of the experience of the student mini-football league of the faculty of Economics and law. 10 teams participate in the opening tournament.

The main goal of the club is to develop mass student sports, organize competitions and events aimed at promoting youth sports and a healthy lifestyle.

FACULTIES

Education at the University is conducted in 8 faculties.

Each faculty offers several educational programs

Choose a program that is interesting for you, combine education in several specialties, get the first and second higher education at the same time, study at a convenient time for you — everything is real in our University.

HISTORICAL FACULTY

Studying significant historical events and people is like traveling through time. History studies the past and the legacy of the past in the present. This is necessary in order to know how our modern world and the peoples of our planet have become as we see them today, as well as how we have evolved.

In 1985, the first 43 students crossed the threshold of the faculty of history, thus laying the foundation for its history. But as the years passed, the faculty developed and took one of the leading places among universities in Western Kazakhstan. Today, the faculty has more than 500 students. In 2019, the building of the faculty of history was named after the Kazakh historian Bekezhhan Suleimenov.

When we understand what we share in common with people from the past, as well as the differences in the present, we form an awareness of our society, its present, past and future.

PROFESSIONAL AND CREATIVE FACULTY

Art admires sport, just as sport is, in part, the highest art. And there is on extremely important skill, and there is a prerequisite is a divine gift, talent.

But talent is only a small part of success. Everything else is practice, practice, and practice again. You may be the most talented person in the world, but without hard practice, it won't do any good. At the University, you will get exactly what you dreamed of when you went to the "art school" or to the sports section.

In 1992, the faculty for training engineering and teaching staff was opened in our University.

In 2017, the professional and creative faculty was opened.

TECHNICAL FACULTY

The growth of industrial capacities and improvement of technological processes puts technical professions in the first place when choosing a specialty for young people. No production now, as at all times, is complete without engineers. Large-scale productions that require modern processing of raw materials are in dire need of competent specialists.

The technical faculty was established in 1996 and is one of the major structural divisions of the K. Zhubanov Aktobe regional state university, which trains technical personnel with higher professional education for enterprises and organizations of various sectors of the national economic complex of the Republic of Kazakhstan.

Memorandums were signed with such giants of industry as TNK "Kazchrome", JSC "KazTransOil", the Aktobe rail and structural plant and many others. These companies provided an opportunity for students to study in the dual form of education, get skills in the profession and, in addition, get paid for practice.

EDUCATIONAL PROGRAM

Bachelor's programs

6B07101-TRANSPORT, TRANSPORT EQUIPMENT AND TECHNOLOGIES

FACULTY OF NATURAL SCIENCE

Biology covers everything from the molecular study of life processes to the study of animal and plant communities. What can I do with a biology degree? Depending on individual interests and preferences, you can choose any profession you like in areas such as health, medicine, environment, education, biotechnology, criminology, politics, and many others.

The faculty of natural science was founded in February 1978

FACULTY OF ECONOMICS AND LAW

There are a lot of people who firmly believe that they do not need economic knowledge at all. Especially when you consider that everyone in the economy is "well versed" even without knowledge. After all, we always give advice on how to treat, how to raise children and how to run the country. The study of economics allows us to come to a more rational management of the economy. If competent economists are in power who care about the welfare of the state, this allows you to bring the country to a higher economic level. If the company has a good economist, the company develops, enters into profitable contracts and thrives.

In 1992, for the first time in the history of the university, the faculty of Economics was opened and in 2001-the faculty of law. On September 1, 2014, the Institute of Economics and law was established as a result of the merger of the faculties of Economics and law. Since May 2017, it has been reorganized into the faculty of Economics and law.

EDUCATIONAL PROGRAM

Bachelor's programs

6B03101-LAW 6B04101-ECONOMICS
6B04102-MANAGEMENT

PHILOLOGICAL FACULTY

A language is a clue, a key, or an encrypted code for an entire culture. The history of the faculty of Philology dates back to 1966. One of the two specialties that opened in the year mentioned above, when the Aktobe pedagogical Institute was established, is "Russian language and literature". The Russian Kazakh language and literature in schools with non — Russian language of instruction, and Philology (Kazakh/Russian) were opened in 1989.

In the modern world of globalization and the internet, professions require knowledge of one to two foreign languages. This is most often English, French, German, and plus knowledge of modern languages for business communication-Chinese, Russian.

72% of graduates of the faculty have a permanent place of work, among them 65% work in state institutions of Aktobe, Kyzylorda, Atyrau, Mangistau, and West Kazakhstan regions.

EDUCATIONAL PROGRAM

Bachelor's programs

- 6B01701 – The Kazakh language and literature
- 6B01702 – The Russian language and literature
- 6B01704 – The Russian language and literature in schools with non - Russian language
- 6B01705 - Kazakh, Russian languages and literature
- 6B01706 - Foreign language: two foreign languages
- 6B02301 - Digital linguistics
- 6B02302 - Translation
- 6B02303 - Foreign Philology
- 6B02304 - Philology: Kazakh philology
- 6B02305- Philology: Russian philology

Educational trajectories: journalism, documentation in kazakh/ russian and chinese.

Magistracy:

- 7M01701-Kazakh language and literature
- 7M01704 – The Russian language and literature in schools with non-Russian language of instruction
- 7M01706 - Foreign language: two foreign languages
- 7M02303- Foreign philology
- 7M02304- Philology

PHYSICS AND MATHEMATICS FACULTY

If you want to be effective in life, achieve your goals - even basic knowledge of mathematics will give you all this in abundance. This is a science that teaches you to draw conclusions and analyze. It teaches you to reason logically, to argue your point of view. Mathematics trains memory, develops the ability to concentrate, communicate, and predict. And the development of critical, abstract, and logical thinking through mathematics is quite priceless.

Just think, all the technologies available to us are possible thanks to mathematics! It is with its help that we describe, model, predict and plan specific and real processes. All laws in our world are subject to the laws of mathematics-the car goes, the plane flies, the TV shows the image...

The faculty of physics and mathematics was established in 1966 and has become the leading educational and scientific center of the region for training and conducting fundamental research in the field of mathematics, physics, and information systems.

EDUCATIONAL PROGRAM

Bachelor's programs

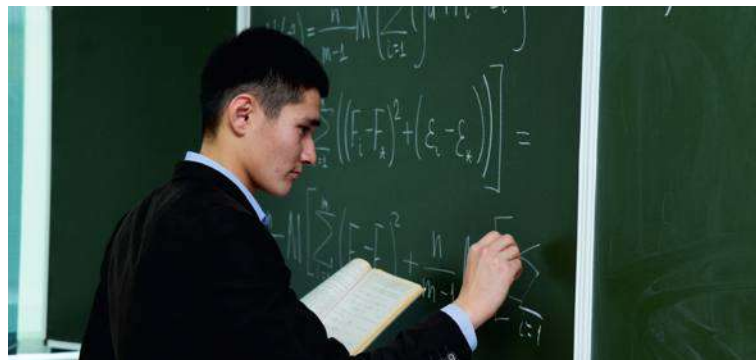

6B01501-MATHEMATICS
6B01502-PHYSICS
6B01503-COMPUTER SCIENCE

HIGHER COLLEGE

In the life of every teenager, it is time to make an important decision: to continue studying at school or make a choice in favor of professional education and go to a technical school or college. One of the main advantages is that students in college can get a profession much earlier than peers who stay in school. And a nice bonus for students is the beginning of a real student life two years earlier than their peers: new friends and hobbies, creative and intellectual projects, competitions, festivals, clubs and sections, as well as a healthy youth environment.

Higher College of K. Zhubanov Aktobe regional state university, initiated by the rector Bauyrzhan Yerdembekov, was opened on June 1, 2018. Currently, the college trains specialists in technical and vocational education in the following specialties.

EDUCATIONAL PROGRAM

0101000-PRESCHOOL EDUCATION AND TRAINING
0103000-PHYSICAL CULTURE AND SPORTS
0105000-PRIMARY EDUCATION
0111000-BASIC SECONDARY EDUCATION

ABOUT UNIVERSITY

ADMISSIONS COMMITTEE

Time of creation-September 2017

Our University is the basic higher education institution in the region, and accepts documents for Unified national testing, for a state educational grant, and conducts creative and special exams.

The ARSU admissions Committee is the division that conducts the admissions campaign for the next academic year.

The Department is open all year round.

ABOUT UNIVERSITY

ADMISSIONS COMMITTEE

LIST OF REQUIRED DOCUMENTS:

Statement
UNT certificate
Certificate or diploma (original)
6 photos 3x4
Medical certificate 086-U
Copy of ID card

Foreign citizens who arrived in the Republic of Kazakhstan for the purpose of entering the university, at the stage of entrance examinations, must independently, within 3 working days from the date of arrival, contact the migration service at the place of residence for notification of their arrival and stay for up to 1 month.

When crossing the state border of the Republic of Kazakhstan, they receive and fill out a migration card, which is stamped with a border control stamp.

Check-in to ZHUBANOV UNIVERSITY for training no earlier than September 1 of the current year.

Purpose of stay: «STUDY»
Copy of passport
Copy of immigration card
Copy of certificate of temporary registration,
Copy of the medical examination
Address certificate
Certificate of education
2 Photo 3x4
Questionnaire of foreign citizens in the
Republic of Kazakhstan
